

## Introducing Pro Charging Systems New Remote Display Indicator

- Puts Battery Status Information Where You Need It
- Improves Monitoring of Battery Charge Levels
- Accurately Displays Battery State
- Thin Durable Design - Built To Last
- Easy to Install
- Water Resistant

May be used in many applications including: **Boats, Golf Carts, Electric Utility Vehicles, Aerial Lifts, Lift Trucks, Scrubbers, Emergency Vehicles, and More...**

Pro Charging Systems (PCS) new remote battery display indicator is designed to work with the company's sophisticated Eagle Performance Series of battery chargers. If your application requires installation of the battery charger in a part of your equipment that is not easily accessible, the remote battery display indicator enables you to put battery charging information right where you need it. Equipment operators can then easily view the state of the battery as it is being charged by the charger. The remote battery display indicator also displays trouble codes to inform operators about any issues relative to the battery charging process. These remote display indicators are built with high quality components and manufactured to last. We pride ourselves on the performance and versatility of our products and our outstanding customer service. We are also proud that this product is made here in the USA.

### Features of the Remote Display Indicator:

- Enables Custom Placement of the Remote Display
- Improves Access to Battery Charging Information
- Accurately Displays Battery State
- Remotely Displays Trouble Codes
- Easy Installation - Connect It and Forget it
- Rugged PC ABS Polymer Case
- Water Resistant Design

**\*Compatible with all Eagle Performance Series On-Board Units**
